

NCD Testimonials sent by email to John Haremza

"I have been taking the drops now for close to three weeks and am having wonderful results with the Lupus that I've had for 15 years. I have been totally pain free for three days now which is absolutely amazing. I don't remember when I have not had constant pain either in my arms, shoulders, hips, knees or back. I can lay down in bed to sleep and actually feel NOTHING!! It's absolutely amazing!!! I have a great testimony to give those that know me and know the pain I have been in for so many years. I actually wake up in the morning and am able to jump out of bed without having to take my time and I feel totally alert. I'm not tired from having to turn constantly at night to relieve the pain. I just laid in bed enjoying how good it really felt to be able to do that again."

Bev P.

Cottage Grove, OR

I started on the NCD on December 28, 2005 after several days of having the flu. My daughter put the product in my water so that I would start feeling better. When I told her that I didn't want to get sick like "that" again, she handed me the bottle and said I should keep taking "this"! I decided that I would keep taking it and only after about 3 weeks, I contacted her to let her know that my bald spots on the back of head were filling in with THICK hair!!! (At Xmas I was so embarrassed because I had several bald spots in my hair. I even went and bought 2 wigs so that I wouldn't have to be seen in public with such thin hair!) I was so excited that I wanted to share with everyone. (Note the dark spots - that's where it was bald!) This is a great "side-effect" of the liquid zeolite!

After taking NCD for about 2 months, I thought nothing had really happened. We have been on a good diet and meditate every day so our health has been fine. Then I discovered I had been driving at night without needing glasses. This was amazing as night blindness has been a problem for many years and now it's gone. Not only can I see, but don't need glasses either! Have also noticed far less "brain fog" in the morning and it is easier to get up.

Michael W., ND

In February of 2006, when I went to my cardiologist, they heard something that they didn't like under my left ear. I have problems with heart valves that don't close all the way, going into and out, of which the cardiologist keeps an eye on to make sure I do not have an enlarging of the heart. Since it had been two years since my last echogram they scheduled me for the echogram and also to do an echogram under my ear! They found what they suspected under that left ear. Another heart specialist scheduled me for an angiogram to see how bad the problem was.

I had just found out the schedule date of the angiogram, March 14, 2006, when a friend who lives on the coast, told me about some drops her daughter was on. She forwarded the info to me and I contacted Marcy Littlejohn right away. Within days I was using this amazing clear white drops called Zeolite. I have for as long as I can remember huge veins that are unsightly on the back of my hands. After a couple days of the larger amount of drops, I noticed that these veins had gone way down. I knew then, that when I went in for that angiogram, the problem under my left ear would not be near as bad as they thought. And I was right. The Doctor came smiling into the room and said it wasn't, THAT BAD, no problems that he could see for now and scheduled me back for another echogram in September.

By telling my story, I make no medical claims. It is what has happened to me and you, or someone else could have entirely different results.

I had an ingrown toe nail which I removed it myself although it really hurts. I noticed it is swollen and still hurt a little bit. I run out of antibiotic medicine so i remember NCD. I put one drop and after a few minutes it didn't hurt anymore and when i checked it the next day it was not swollen and the redness is gone. Another testimonial is about my son.

On the 5th of July my son, 8 years old, had eaten the fried rice that i cook. He complained of stomach pain and seems like throwing up but doesn't want to. He said he is scared of throwing up and he wants to go to

the doctor, that was almost 12 midnight, what i did is gave him 3 drops of NCD and added another 3 drops after a minute. I remember that if NCD remove toxins from the body so i figured out that he has food poisoning and this can clear the toxins from his stomach. I observed him and if he will not get better i will bring him to emergency in the hospital. After a few minutes i asked him how he feels and he said he feels better until morning when i got up in bed he was still sleeping. The last one that i can share is about my pet cat. I noticed he was sick not eating and lose weight. I put 15 drops of NCD in his water. I saw him drinking it. Next day he was full of vigor playing with the other cat and eating his food already.

My 8 yr old daughter Savannah, who is Downs Syndrome, had this growth developed on her right calve muscle last summer. When we noticed the growth it was about the size of a small pebble. It was flesh colored and grew up in height about the same dimension it was across. We watched it for a few months and it got bigger. When it got to be the size of a pencil eraser we took her to the pediatrician. He gave us a prescription for something and we applied it, but it did no good. We were going to take her to a dermatologist, but I told my wife I wanted to try the NCD. She started taking NCD about 4 months ago. At that time it was about as big a an eraser, and was raised up about 3/8 of an inch. Since taking NCD the site has changed colors from pinkish to black. Also the height has receded to skin level. I have felt it and it feels like it was below the skin as well. You can still see where it was because the skin is now black, but it appears to have killed what ever was there and now is getting smaller because new skin and tissue are regrowing.

I've been taking the Natural Cellular Defense for about 28 days now and here are my results:

1. 95 % relief of back pain caused from a herniated L4-5 disk
2. increased REM sleep; increased overall sleep nightly from 5 hours per night to 7.
3. No muscle soreness from workouts no matter how hard I work out.
4. Improved ability to focus and concentrate - no "mind fog", even on the now rare times I sleep poorly the night before.
5. Less frequency of feeling "stressed out" throughout the day
6. Decrease in sinus/allergy symptoms - symptoms about 85% resolved
7. complete ventilation of right nostril that has had obstructed air flow due to a cyst in my sinus for 10 years.
8. No esophageal reflux, no matter what I eat.

All this after just 28 days.

Jeff R.

Minot ND

On 1 Dec 05 my wife and I began the NCD detoxification program with 10 drops three times a day for ten days and then the suggested daily maintenance of 3 drops 3 times a day thereafter. On Dec 23 I was listening to a Dr's testimonial of one of his patience when at the end of the testimonial he said, "On a personal note, I had skin cancer on my forehead and now it is gone. Shocked, I had totally forgotten that I had skin cancers on my forehead. I pulled the phone from my ear, touched both sides of my forehead with my hand, looked in the mirror in the back of my office hutch and... my skin cancers, squamous on the right side and basil on the left, were gone. I went to my MD two weeks later and she confirmed they where indeed gone. 23 days. Nothing but NCD.
